

ProMask

ProMask is a multilayer cast polypropylene film that has been engineered for use as a substrate for adhesive-coated protective masking tapes. ProMask is corona treated on one side so that it can be easily coated with a variety of water-based and solvent-based adhesives.

APPLICATIONS:

- Protective masking tapes
- Automotive transit films
- Consumer products masking films
- Architectural masking films

ADVANTAGES:

- Excellent lay-flat characteristics
- Good dimensional stability and low shrinkage
- Excellent chemical resistance
- Good unwind characteristics
- UV stabilized for outdoor use
- Resists watermarking, spotting, and imprinting
- Excellent water barrier properties
- Corona treated on one side for adhesive coating
- Recyclable

MANUFACTURING CAPABILITIES:

- In-line corona treatment on one side for adhesive coating
- Clear and white films are standard
- Custom colors are available upon request
- Thickness range: 1.8 mil to 9 mil thick
- Standard web widths: 56" - 83"
- In-line slitting to custom roll widths
- Biodegradable available
